Location: Gurugram, INDIA

Experience: 4 Years of experience

PROFILE SUMMARY

Senior Software Backend Engineer with 4.7 years of experience in designing and developing scalable backend applications using Java, Spring Boot, REST APIs, SQL, and Microservices. Experienced in CRM and CTI integrations including Microsoft Dynamics 365, ServiceNow, HubSpot, Salesforce, and Cisco Finesse. Proven ability to independently own end-to-end projects, handle multiple development initiatives, resolve critical P1/P2 production issues, and deliver high-performance solutions in Agile environments. Skilled in API development, system integration, debugging, CI/CD, and mentoring junior developers while collaborating effectively with cross-functional teams.

KEY SKILLS

Java	Spring Boot	Microservices	REST APIs	SQL	MySQL	Hibernate	JPA	Git	CI/CD
CRM Integration	CTI Integration	Cisco Finesse	Salesforce	Microsoft Dynamics 365	ServiceNow				
API Development	Production Support	P1 Incident Management	Root Cause Analysis	Client Management					
Technical Mentoring	Postman								

CERTIFICATIONS

Received 8 'Pat on the Back' awards at NovelVox for exceptional performance and project delivery.

Performance of the Year Award

WORK EXPERIENCE

Software Developer

Oct 2021 - Present

Novelvox pvt ltd

I am currently working as a Software Backend Engineer at NovelVox, where I play a key role in the successful delivery of enterprise-grade CRM and CTI integration solutions. I independently drive projects from requirement gathering and solution design through development, deployment, and production support. My responsibilities include collaborating with clients and cross-functional teams, managing multiple priorities simultaneously, resolving critical production issues, and ensuring timely delivery of scalable, high-performance solutions. I am also actively involved in technical decision-making, client interactions, mentoring junior team members, and maintaining high standards of code quality and system reliability. Additionally, I actively explore emerging AI technologies and tools such as ChatGPT and Claude to enhance productivity, automate repetitive tasks, accelerate development workflows, and identify innovative solutions that improve operational efficiency and business outcomes.

PROJECTS

Deliverect- ZCC—HubSpot CTI Integration via Chrome Extension

6 Months

Technologies: Node.js, JavaScript, HubSpot APIs, Azure

- Developed a Chrome Extension-based integration enabling real-time communication between contact center and HubSpot platforms.
- Built webhook-driven synchronization services for customer interactions, call activities, and CRM updates.
- Improved data consistency and reduced manual agent effort through automated interaction logging.
- Delivered end-to-end integration while coordinating with cross-functional teams and client stakeholders.

- Technologies: Java, Spring Boot, REST APIs, Apache Tomcat, Apache HTTP Server, Microsoft Dynamics 365, ServiceNow
- Developed enterprise CTI integrations with Microsoft Dynamics 365 and ServiceNow for banking operations.
 - Configured Apache Reverse Proxy and Tomcat Clustering to ensure high availability, load balancing, and fault tolerance.
 - Built REST APIs for real-time call event processing and CRM synchronization.
 - Optimized application performance through infrastructure tuning and session management.
 - Resolved critical P1/P2 incidents and performed root cause analysis to improve system stability.
 - Collaborated with client and infrastructure teams during deployments, releases, and production support.

- Technologies: Java, Spring Boot, REST APIs, JavaScript
- Built enterprise-grade CTI integration supporting real-time agent state management and customer interaction tracking.
 - Developed event-driven workflows to synchronize telephony activities with CRM records.
 - Improved system reliability through extensive debugging, API monitoring, and performance optimization.
 - Worked closely with business teams to deliver scalable solutions aligned with operational requirements.

- Technologies: Java, Hibernate, SQL
- Integrated Cisco UCCE data sources with a real-time wallboard reporting platform.
 - Developed optimized SQL queries and backend services for live contact center analytics.
 - Implemented Microsoft Teams alerting for threshold breaches and operational events.
 - Enhanced reporting visibility and enabled proactive monitoring for contact center operations.

- Technologies: JavaScript, Zoho CRM APIs, Zoom APIs, REST APIs
- Designed and implemented a Zoom integration within Zoho CRM to streamline meeting management and customer engagement workflows.
 - Developed JavaScript-based automation and API integrations for meeting creation, updates, and synchronization between Zoom and Zoho CRM.
 - Automated storage and synchronization of meeting details, participant information, and interaction history within CRM records.
 - Customized Zoho CRM workflows and business processes to align with client requirements and operational needs.
 - Independently delivered the end-to-end integration, from requirement gathering and solution design to deployment and post-production support.
 - Investigated and resolved integration issues, optimized API interactions, and ensured reliable communication between Zoom and Zoho CRM systems.
 - Collaborated directly with business stakeholders and clients to deliver enhancements and improve user experience.

- Technologies: Java, JavaScript, AWS S3, CloudFront, Salesforce, Cisco Finesse
- Architected and delivered a cloud-hosted CTI solution integrating Salesforce CRM with Cisco Finesse for seamless agent workflows.
 - Developed real-time call control, screen-pop, and customer interaction management capabilities.
 - Implemented scalable deployment architecture using AWS S3 and CloudFront, improving application availability and performance.
 - Designed supervisor monitoring capabilities including silent monitoring and barge-in functionalities.
 - Collaborated directly with client stakeholders to ensure successful deployment and production support.
